Serious, passionate and creative, I will be graduated in October 2020 with a Master in Computer Science from EPITECH - Paris Graduate School of Digital Innovation and I'm looking for a full-time job as software engineer.

Skills

Proficient

- C
- C++
- C#
- JS
- Unity3D
- React
- React Native

Familiar

- JAVA
- Python
- Unreal Engine
- NodeJS

Languages

- English: Fluent
- French: Native
- German: Beginner
- Arabic: Beginner

Hobbies

- Video Games
- Animation
- Cinema
- History
- Science

Working Experience

March 2020 - September 2020 Salesforce Developer intern at Isochronix

- Successfully Wrote backend classes to manage database through salesforces environment in Apex / Java language.
- Created Front web pages in HTML / CSS / JavaScript for Salesforce Organization.
- Implemented Integration and Unit test on large back-end application.

May 2018 - August 2018 Assistant Project Manager and React Native intern at Simplelif' for the application Bonami

- Successfully Implemented a mobile application on Ios and Android using React JS from the beginning until the first beta version, including a local database and communication with a REST API.
- Managed the front-side project by planning the task for all the differents sprints (agile / scrum).

August 2016 – November 2016 Unity3D intern at 3drudder

- Improved their VR demo on HTC Vive and Oculus Rift by implementing new features and levels using C# and Unity3D, like an in-game tutorial level to simplified the explanation during the demonstration of their product.
- Design and implemented a short arcade game with the 3drudder and HTC Vive.
- Established different quality test by testing many games with their device and write documentation about the utility of their controller in game.

Education

2018-2020: Master in Computer Science at EPITECH Paris Graduate School of Digital Innovation (France)

Courses taken : Epitech Innovative Project, Game design, Internet of Things, Project Management, Kernel Programing, Algorithm, DevOps

2018-2019: Exchange Student in Master of Information Technology at AHLIA University, Bahreïn

Courses taken : Business Intelligence, User Experience, E-Commerce, Android Programming, Bioinformatics, Network Security, Artificial Intelligence, Cloud Computing

2015-2018: Bachelor in Computer Science at EPITECH Paris Graduate School of Digital Innovation (France)

Courses taken : Initiation C, Initiation C++, Advanced C, Advanced C++, Computer Graphics, System administration, SQL and Database, Unity3D, Cryptography, Java Development, C# .NET Development, Mobile Development, Artificial Intelligence

2014: Baccalaureate (A level) Science - Speciality Physics Chemistry, High School St Charles, Marseille, France
